

Murrumbidgee River: Kambah Pool

BIDGEE BLUE

The State of the Stream:

- Turbidity spikes are becoming increasingly mild
- Salinity is also falling and stabilizing in its fluctuations
- Dissolved Oxygen levels are stabilizing at high enough levels to support most fish life
- While a very public site, it has been remarkably clean
- Little algal growth
- Frequent public use may be affecting macroinvertebrate diversity

Current Activities:

- Monthly monitoring
- Seasonal macroinvertebrate surveys

	pH	Turbidity	Electrical Conductivity	Dissolved Oxygen	Orthophosphate
High	7.9	100	160	11.6	.18
Low	6.7	9	30	4.6	.0
Mode	7.2	9	110	10	.01
Mean	7.4	13	92	8.5	.05

Potential Waterwatch Projects:

- **Revegetation**
- **Riparian Assessment**
- **Species list**
