

# Tuggeranong Creek: Lower Site

## The State of the Creek 2006:

- Anecdotal assessment of aquatic plants, and macroinvertebrates indicate this site is effectively treating storm water out flows from Lake Tuggeranong
- Snags and log jams creating a complex benthic environment
- Good system of pools and riffles
- Healthy stands of *Casuarina cunninghamiana* present

## Current Activities:

- Weed Control
- Education Programs
- Species List
- Seasonal monitoring

## Potential Waterwatch Projects:

- Riparian Assessment
- Monthly monitoring
